Office Action Summary

Application No.

09/974,697

Applicant(s)

PEARSON, CHRIS C.

Examiner

Kevin Y Kim

Art Unit

2634

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10-10-2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities:

a) The word –frequency-- is missing after the recitation of “the DC harmonic and the fundamental.”

b) “code error” should be “a cord error.”

Appropriate correction is required

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1.

a) “the low slew rate” should be “a low slew rate” since there is no positive antecedent basis.

b) “the high slew rate” should be “a high slew rate” since there is no positive antecedent basis.

c) “*the* high slew variance” lacks a positive antecedent basis but is read as the variance of the code error determined at the high slew rate. Emphasis added.

d) “*the* low slew variance” lacks a positive antecedent basis but is read as the variance of the code error determined at the low slew rate. Emphasis added.

e) the limitation “calculating the jitter on each angle from the high slew variance by each angle and the low slew rate variance” is confusing because of the double use of “on each

Art Unit: 2634

angle” and “by each angle.” It appears that the phrase “by each angle” was inserted inadvertently, and thus the claim will be understood without the phrase.

Claim 2.

“the *phase* code error” has no antecedent basis but will be read as “the code error” recited on line 7 of claim 1. Emphasis added.

Claims 3 and 4 are rejected as dependent on rejected base claims respectively.

Allowable Subject Matter

3. Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

4. The following is a statement of reasons for the indication of allowable subject matter: No prior art has been found to teach a jitter measuring method including the steps of unwrapping data from a device under test, performing FFT, removing the DC harmonic and fundamental frequency, performing an inverse FFT to generate a code error, adjusting the code error to a predetermined phase, determining the variance of the code error at a low slew rate and at a high slew rate, and calculating the jitter on each angle from the variances determined at the at the low slew rate and at the high slew rate.

Conclusion

Art Unit: 2634

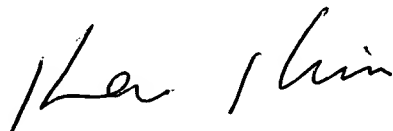

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,795,496 (Soma et al), US 6,687,629 (Yamaguchi et al) and US 5,748,672 (Smith et al) teach a device for measuring jitter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Y Kim whose telephone number is 571-272-3039. The examiner can normally be reached on 8AM --5PM M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 571-272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
